

Handle-cum-intravenous drip stand

(Details of innovation from our partner institution)

Product Description:

The handle-cum-intravenous drip stand adapted to couple with any strolling kit as handle, for use as bottle/bag holder for patients who are in need of I/V fluids. The kit shall be in the form of strolling case with collapsible /foldable handle like in any suitcase with four wheels having locks to maintain the stability and has 2 – 4 foldable embedded hooks which are used for saline / drip bottle holder.

Intended Application:

The handle of the kit can be used as drip / saline stand for patients requiring any IV infusion on site of disaster or medical camp or even for blood transfusion.

Novelty of the product:

- Light weight, collapsible, cost effective
- Can be adapted to couple with any strolling kit as handle
- Ideal for onsite of disaster or medical camp or even for blood transfusion

Technology Readiness Level:

Prototype Developed. Validations pending

IP Status:

Indian patent application filed (IN201941013001)
