### Knowhow offering

Title	TransReCon: A novel vial adapter drug reconstitution device
Knowhow is available for	A novel portable, non-bulky device for reconstitution of solid or semi-solid pharmaceutical composition under sterile conditions in low resource settings
Summary	A novel portable, non-bulky device for reconstitution of solid or semi-solid pharmaceutical composition under sterile conditions in low resource settings. This will be useful especially for eye and ear drops unstable in suspension/ liquid form.
Advantages	Affordable Aseptic transfer of diluents Designed to perform drug reconstitution in low resource settings as well. Customizable adaptor shape based on type of vials Calibratable first vial to transfer accurate volumes in to the second vial. Efficient material transfer as it works on the principle of pressure differential created between the 2 vials Controlled flow of components to increase the dissolution of components. Complies with needlestick prevention laws in within the US, Europe

### Knowhow is listed under following categories

Knowhow from	
Scientific/ engineering subject areas	<b>Life sciences/ biosciences &amp; engineering</b>
Investor interest categories	<b>Biotechnology/ Biomedical/ Health Technologies</b>
Industries	<b>Medical Biotechnology, Biomed Products, Medical Healthcare, Diagnostics ;</b>
