Knowhow offering

Title	A SELF-SUPPORTING SURGICAL DEVICE AND ITS USE IN CREATION OF ARTERIO VENOUS FISTULA
Knowhow is available for	a self supporting surgical Jig for creating arterio venous fistula (AVF) which would help to maintain the position of clamps at a fixed place(no assistance is required in holding the clamps)
Summary	a self supporting surgical Jig for creating arterio venous fistula (AVF) which would help to maintain the position of clamps at a fixed place(no assistance is required in holding the clamps) and as a result, operation procedure can be done fast with stable position of artery and vein.
Advantages	Cost effective supporting instrument at AV fistula Stable positioning & secure anastomosis during AVF creation No assistance is required to hold the clamp Avoids repetitive shifting of clamps during procedure Avoids twisting or rotating the veins Reduces operating time & improves quality of anastomosis

Knowhow is listed under following categories

Knowhow from	
Scientific/ engineering subject areas	Life sciences/ biosciences & engineering
Investor interest categories	Biotechnology/ Biomedical/ Health Technologies
Industries	Medical Biotechnology, Biomed Products, Medical Healthcare, Diagnostics
Customer categories and nature of business	Businesses and other industries (B2B)
Technology readiness levels
