Knowhow offering

Title	A novel compound for the selective staining and detection of lysosomes in cells
Knowhow is available for	Preparing a novel BODIPY-based fluorescently labelled compound for selectively staining and detecting lysosomes in cells.
Summary	
Advantages	Reaction is non-toxic in nature Reaction is photostable under super resolution microscope Prepared compound from the reaction is highly specific to lysosome Prepared compound is useful in the live imaging of lysosomes in the cell Prepared compound helps understand the status of lysosome in live cells

Knowhow is listed under following categories

Knowhow from	
Scientific/ engineering subject areas	Life sciences/ biosciences & engineering
Investor interest categories	Biotechnology/ Biomedical/ Health Technologies
Industries	Pharmaceuticals, Bulk Drugs, Formulations
Customer categories and nature of business	Businesses and other industries (B2B)
Technology readiness levels
